

PT. TARIFA INDONESIA is official authorized distributor of [**Sonic and Material Inc**](http://www.sonics.com/index.php) product in Indonesia. You can explore ultrasonic system <http://www.sonics.com/index.php> . You can contact us for your ultrasonic system. We have ultrasonic processing system for example Vibra-cell and its accessories. [Vibra-cell System](http://www.sonics.com/lp-vibra.htm) : The Vibra-Cell is the most technologically advanced high intensity ultrasonic processor available to the researcher. Extremely capable and versatile, it can safely process a wide range of organic and inorganic materials from microliters to liters. Typical applications include: sample preparation, dispersion, cell lysing, desegregation, homogenization, particle size reduction, soil testing, transesterification (including biodiesel production), nanotechnology (including nanoparticle and Graphene dispersion), acceleration of chemical reactions, degassing and atomization. Our line product have capacity from few L to over 20 L. You can download our catalog [here](http://www.sonics.com/catalog.pdf) You can see the video of vibra cell system [here](https://www.youtube.com/watch?v=bosbqWOyn8&list=UUhPzAqH9O_Oy7SOeOaf3Rsw&index=11) This is example of Vibra-Cell system:

1. VCX 130

 Feature:

- Energy monitor
- Digital wattmeter
- Ten hour timer
- 1-59 second independent ON/OFF pulser
- Variable power output control
- Remote process capability

2. VCX 500

 Features:

- Energy setpoint
- Wattmeter
- Integrated temperature controller
- Variable power output control
- Ten hour process timer
- Independent On/Off pulser
- Remote process capability

3. VCX 1500

4. VCX 1500 HV

 Feature:

- For large and industrial applications
- Over 20 liters on a flow through basis
- Automatic tuning
- Full function process timer
- Remote process capability
